THOMAS DICKEY
PRIMARY PATENT EXAMINER

Art Unit: 2826

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE CLAIMS:

Cancel claims 57-60, 69-79, 100-109, and 118-129.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance:

In their paper filed 9/7/07 Applicants point to the claim 1 limitation recited as a "non-porous inner wall" and assert that nanotubes disclosed by Wu et al. (Appl. Phys. Lett., Vol. 81, No. 7, 12 August 2002) fail to meet this limitation.

"Non-porous" means many things to many people. The trick is to gain some inkling of what Applicants mean by "non-porous." Wu et al. have kindly supplied a high resolution TEM photo of their walls in their figure 3, so the reader may visually confirm the type of structure which is too porous to meet Applicants' definition of "non-porous." The walls of Wu et al's ZnO nanotube (as shown in the photo) appear (to the Examiner's eye – the reader may of course judge the photo for himself or herself) to have a regular structure of pores on the order of 2-3 nm wide. These pores are, in

Art Unit: 2826

Applicants' view, too porous to meet Applicants' standard of what constitutes a "non-porous" wall.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas L. Dickey whose telephone number is 571-272-1913. The examiner can normally be reached on Monday-Thursday 8-6.
